

WEBINAR

DIH4Taking project's results: Technological innovation in electronics

20TH DECEMBER 2023 | 4:00 PM

As part of the **DIH4TAKING** project, **DIH Lombardia**, **Intellimech** and **INESC TEC** organize the webinar "*DIH4Taking project's results: Technological innovation in electronics*". During the event, partners will present the results of the project that focuses on **object sensing and pose estimation for Pick and Place activities** of **electronic components**. **DIH4TAKING** aims to **develop an integrated and modular sensing pipeline** supported by the principles of Industry 4.0 in order to reap more of the benefits provided by **Artificial Intelligence technologies** in this sector.

The agenda includes:

- *Digital maturity in electronics industry*, **Manuel Astuto**, Business Analyst, DIH Lombardia
- *Perception module's results*, **Davide Pasanisi**, Artificial Intelligence Engineer, Intellimech
- *Pick&Place simulation module's results*, **Sérgio Daniel Marinho**, Researcher, INESC TEC
- Q&A session

The event will be held in **English**.
